Heat Treating Oils for Steel (Quenching oils)

UNIQUENCH series has arranged various products which have excellent performances as quenching oils in the metalworking industry. For cold quenching oil, semi hot quenching oil, hot quenching and tempering oil, a highly refined paraffinic mineral oil is used to achieve the best treatment of steel in a wide range of quenching operations. Those quenching oils are excellent in oxidation stability. Moreover, they give bright finish on parts being quenched. As water-soluble quenching liquid, UNIQUENCH WG(N) is recommended. This fluid is based on polyalkylene glycol with a preservative agent.
